Changing the screen layout

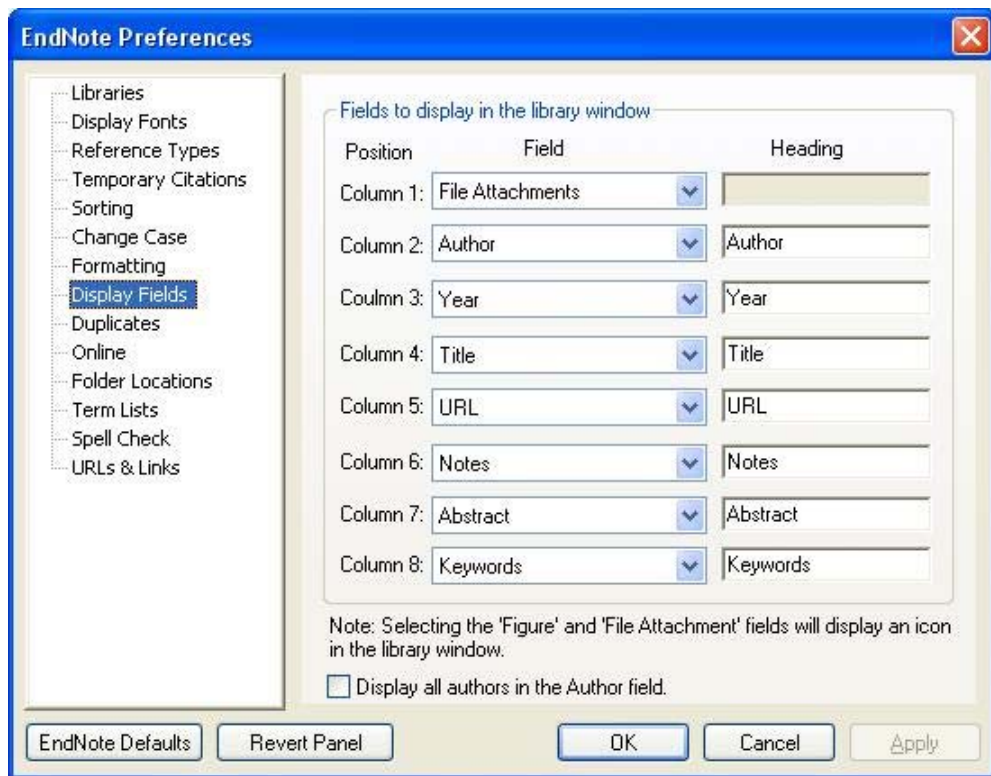

Sometimes it is useful to display a different sets of fields in the main EndNote library window, for example, so you can quickly see which references you have PDFs for.

To change which fields are displayed:

- Run the **EndNote** program.
- Click on **Edit | Preferences**.

- Click on **Display Fields**.

- Choose the fields to display from the drop-down boxes. Change the heading text to read the same as the field name, or an abbreviation of the field name.
- Click on **OK**.

If you have any problems using EndNote, please contact your [local EndNote support person](#) or contact Peter Blake via libraryadmin@mcauley.acu.edu.au .
